Push-Ups

How many push-ups can you do in 60 seconds?

What to submit: Count and record the number of push-ups you can do in one minute (60 seconds).

Please review the safety information below:

Regular physical activity is vital for good physical, social and emotional health. While there is a risk of injury with any type of physical activity, the benefits of staying active far outweigh the risks.

You can reduce your risk of exercise injury by:

- Wearing the right shoes
- Using the correct equipment
- Drinking lots of water – stay hydrated
- Warming up and stretching properly
- Be aware of your surroundings - exercise in a safe and level area clear of any obstacles or items
- Maintain social distancing rules when exercising

Stop exercising immediately and seek medical help if you experience symptoms such as:

- Discomfort or pain
- Chest pain or other pain that could indicate a heart attack, including pain in the neck and jaw, pain traveling down the arm or pain between the shoulder blades
- Extreme breathlessness
- A very rapid or irregular heartbeat during exercise

***Be sure to practice social distancing while exercising.**
